8

SAFETY AND ASSEMBLY INSTRUCTIONS

- A. Both brackets and bar are made of steel.
- B. Both brackets and bar have random secret codes, that would protect you against counterfeiting and partial replacements. These secrets codes have more than 100,000 combinations.
- C. The "Seaforce 1" is paintless, very important, taking into consideration that the paint could hide any tamper. The "Seaforce 1" is zinc plated finishing
- D. Our device has been specially designed that would protect you against cutting and welding that if occur would leave a huge evidence to users.
- E. The steel pin's head is covered by injected plastic. Beside the serial number comes also with bar codes.
- F. There are other protecting features that are not disclosed for security reason.
